(54) JOB SUPPORTING DEVICE AND ELECTRIC SYSTEM DESIGN SUPPORTING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a job supporting device for supporting a job such as engineering or service.

SOLUTION: A knowledge associated net type knowledge base 3 is provided for modeling a process or structure associated in the case of job execution concerning the job knowledge required for various engineering or service jobs, and this device is provided with an inference part 1 for automating the job while using the knowledge base 3 and a result control part 2 for automating the control of the job result while cooperating with the inference part as needed.

LEGAL STATUS

[Date of request for examination]

25.06.2001

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision
of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
